

COLONIAL SOCIETY IN THE 18TH CENTURY

The American is a new man, who acts upon new principles; he must therefore entertain new ideas, and form new opinions. From involuntary idleness, servile dependence, and useless labor, he has passed to toils of a very different nature, rewarded by ample subsistence. This is an American.

J. Hector St. John Crèvecoeur, *Letters from an American Farmer*, 1782

The Frenchman who wrote the above description of Americans in 1782 observed a very different society from the struggling colonial villages that had existed in the 17th century. The British colonies had grown, and their inhabitants had evolved a culture distinct from any in Europe. This chapter describes the mature colonies and asks: If Americans in the 1760s constituted a new kind of society, what were its characteristics and what forces shaped its “new people”?

Population Growth

At the start of the new century, in 1701, the English colonies on the Atlantic Coast had a population of barely 250,000 Europeans and Africans. By 1775, the figure had jumped to 2,500,000, a tenfold increase within the span of a single lifetime. Among African Americans, the population increase was even more dramatic: from about 28,000 in 1701 to 500,000 in 1775.

The spectacular gains in population during this period resulted from two factors: immigration of almost a million people and a sharp natural increase, caused chiefly by a high birthrate among colonial families. An abundance of fertile American land and a dependable food supply attracted thousands of European settlers each year and also supported the raising of large families.

European Immigrants

Newcomers to the British colonies came not only from England, Scotland, Wales, and Ireland, but also from other parts of Western and Central Europe. Many immigrants, most of whom were Protestants, came from France and German-speaking kingdoms and principalities. Their motives for leaving Europe were many. Some came to escape religious persecution and wars. Others sought

economic opportunity either by farming new land or setting up shop in a colonial town as an artisan or a merchant. Most immigrants settled in the middle colonies (Pennsylvania, New York, New Jersey, Maryland, and Delaware) and on the western frontier of the southern colonies (Virginia, the Carolinas, and Georgia). In the 18th century, few immigrants headed for New England, where land was both limited in extent and under Puritan control.

English Settlers from England continued to come to the American colonies. However, with fewer problems at home, their numbers were relatively small compared to others, especially the Germans and Scotch-Irish.

Germans This group of non-English immigrants settled chiefly on the rich farmlands west of Philadelphia, an area that became known as Pennsylvania Dutch country. They maintained their German language, customs, and religion (Lutheran, Amish, Brethren, Mennonite, or one of several smaller groups) and, while obeying colonial laws, showed little interest in English politics. By 1775, people of German stock comprised 6 percent of the colonial population.

Scotch-Irish These English-speaking people emigrated from northern Ireland. Since their ancestors had moved to Ireland from Scotland, they were commonly known as the Scotch-Irish or Scots-Irish. They had little respect for the British government, which had pressured them into leaving Ireland. Most settled along the frontier in the western parts of Pennsylvania, Virginia, the Carolinas, and Georgia. By 1775, they comprised 7 percent of the population.

Other Europeans Other immigrant groups included French Protestants (called Huguenots), the Dutch, and the Swedes. These groups made up 5 percent of the population of all the colonies in 1775.

Africans

The largest single group of non-English immigrants did not come to America by choice. They were Africans—or the descendants of Africans—who had been taken captive, forced into European ships, and sold as enslaved laborers to southern plantation owners and other colonists. Some Africans were granted their freedom after years of forced labor. Outside the South, thousands of African Americans worked at a broad range of occupations, such as being a laborer, bricklayer, or blacksmith. Some of these workers were enslaved and others were free wage earners and property owners. Every colony, from New Hampshire to Georgia, passed laws that discriminated against African Americans and limited their rights and opportunities.

By 1775, the African American population (both enslaved and free) made up 20 percent of the colonial population. About 90 percent lived in the southern colonies in lifelong bondage. African Americans formed a majority of the population in South Carolina and Georgia.

The Structure of Colonial Society

Each of the thirteen British colonies developed distinct patterns of life. However, they all also shared a number of characteristics.

General Characteristics

Most of the population was English in origin, language, and tradition. However, both Africans and non-English immigrants brought diverse influences that would modify the culture of the majority in significant ways.

Self-government The government of each colony had a representative assembly that was elected by eligible voters (limited to white male property owners). In only two colonies, Rhode Island and Connecticut, was the governor also elected by the people. The governors of the other colonies were either appointed by the crown (for example, New York and Virginia) or by a proprietor (Pennsylvania and Maryland).

Religious Toleration All of the colonies permitted the practice of different religions, but with varying degrees of freedom. Massachusetts, the most conservative, accepted several types of Protestants, but it excluded non-Christians and Catholics. Rhode Island and Pennsylvania were the most liberal.

No Hereditary Aristocracy The social extremes of Europe, with a nobility that inherited special privileges and masses of hungry poor, were missing in the colonies. A narrower class system, based on economics, was developing. Wealthy landowners were at the top; craft workers and small farmers made up the majority of the common people.

Social Mobility With the major exception of the African Americans, all people in colonial society had an opportunity to improve their standard of living and social status by hard work.

The Family

The family was the economic and social center of colonial life. With an expanding economy and ample food supply, people married at a younger age and reared more children than in Europe. More than 90 percent of the people lived on farms. While life in the coastal communities and on the frontier was hard, most colonists had a higher standard of living than did most Europeans.

Men While wealth was increasingly being concentrated in the hands of a few, most men did work. Landowning was primarily reserved to men, who also dominated politics. English law gave the husband almost unlimited power in the home, including the right to beat his wife.

Women The average colonial wife bore eight children and performed a wide range of tasks. Household work included cooking, cleaning, making clothes, and providing medical care. Women also educated the children. A woman usually worked next to her husband in the shop, on the plantation, or on the farm. Divorce was legal but rare, and women had limited legal and political rights. Yet the shared labors and mutual dependence with their husbands gave most women protection from abuse and an active role in decision-making.

The Economy

By the 1760s, almost half of Britain's world trade was with its American colonies. The British government permitted limited kinds of colonial manufacturing, such as making flour or rum. It restricted efforts that would compete with English industries, such as textiles. The richness of the American land and British mercantile policy produced colonies almost entirely engaged in agriculture.

As the people prospered and communities grew, increasing numbers became ministers, lawyers, doctors, and teachers. The quickest route to wealth was through the land, although regional geography often provided distinct opportunities for hardworking colonists.

New England With rocky soil and long winters, farming was limited to subsistence levels that provided just enough for the farm family. Most farms were small—under 100 acres—and most work was done by family members and an occasional hired laborer. The industrious descendants of the Puritans profited from logging, shipbuilding, fishing, trading, and rum-distilling.

Middle Colonies Rich soil produced an abundance of wheat and corn for export to Europe and the West Indies. Farms of up to 200 acres were common. Often, indentured servants and hired laborers worked with the farm family. A variety of small manufacturing efforts developed, including iron-making. Trading led to the growth of such cities as Philadelphia and New York.

Southern Colonies Because of the diverse geography and climate of the southern colonies, agriculture varied greatly. Most people lived on small subsistence family farms with no slaves. A few lived on large plantations of over 2,000 acres and relied on slave labor. Plantations were self-sufficient—they grew their own food and had their own slave craftworkers. Products were mainly tobacco in the Chesapeake and North Carolina colonies, timber and naval stores (tar and pitch) in the Carolinas, and rice and indigo in South Carolina and Georgia. Most plantations were located on rivers so they could ship exports directly to Europe.

Monetary System One way the British controlled the colonial economy was to limit the use of money. The growing colonies were forced to use much of the limited hard currency—gold and silver—to pay for the imports from Britain that increasingly exceeded colonial exports. To provide currency for domestic trade, many colonies issued paper money, but this often led to inflation. The British government also vetoed colonial laws that might harm British merchants.

Transportation Transporting goods by water was much easier than attempting to carry them over land on rough and narrow roads or trails. Therefore, trading centers such as Boston, New York, Philadelphia, and Charleston were located on the sites of good harbors and navigable rivers. Despite the difficulty and expense of maintaining roads and bridges, overland travel by horse and stage became more common in the 18th century. Taverns not only provided food and lodging for travelers, but also served as social centers where news was exchanged and politics discussed. A postal system using horses on overland routes and small ships on water routes was operating both within and between the colonies by the mid-18th century.

Religion

Although Maryland was founded by a Catholic proprietor, and larger towns such as New York and Boston attracted some Jewish settlers, the overwhelming majority of colonists belonged to various Protestant denominations. In New England, Congregationalists (the successors to the Puritans) and Presbyterians were most common. In New York, people of Dutch descent often attended services of the Reformed Church, while many merchants belonged to the Church of England, also known as Anglicans (and later, Episcopalians). In Pennsylvania, Lutherans, Mennonites, and Quakers were the most common groups. Anglicans were dominant in Virginia and some of the other southern colonies.

Challenges Each religious group, even the Protestants who dominated the colonies, faced problems. Jews, Catholics, and Quakers suffered from the most serious discrimination and even persecution. Congregationalist ministers were criticized by other Protestants as domineering and for preaching an overly complex doctrine. Because the Church of England was headed by the king, it was viewed as a symbol of English control in the colonies. In addition, there was no Church of England bishop in America to ordain ministers. The absence of such leadership hampered the church's development.

Established Churches In the 17th century, most colonial governments taxed the people to support one particular Protestant denomination. Churches financed through the government are known as established churches. For example, in Virginia, the established church was the Church of England. In Massachusetts Bay it was the Congregational Church. As various immigrant groups increased the religious diversity of the colonies, governments gradually reduced their support of churches. In Virginia, all tax support for the Anglican Church ended shortly after the Revolution. In Massachusetts by the time of the Revolution, members of other denominations were exempt from supporting the Congregational Church. However, some direct tax support of the denomination remained until the 1830s.

The Great Awakening

In the first decades of the 18th century, sermons in Protestant churches tended to be long intellectual discourses and portrayed God as a benign creator of a perfectly ordered universe. Ministers gave less emphasis than in Puritan times on human sinfulness and the perils of damnation. In the 1730s, however, a dramatic change occurred that swept through the colonies with the force of a hurricane. This was the Great Awakening, a movement characterized by fervent expressions of religious feeling among masses of people. The movement was at its strongest during the 1730s and 1740s.

Jonathan Edwards In a Congregational church at Northampton, Massachusetts, Reverend Jonathan Edwards expressed the Great Awakening ideas in a series of sermons, notably one called "Sinners in the Hands of an Angry God" (1741). Invoking the Old Testament scriptures, Edwards argued that God was rightfully angry with human sinfulness. Each individual who expressed deep

penitence could be saved by God's grace, but the souls who paid no heed to God's commandments would suffer eternal damnation.

George Whitefield While Edwards mostly influenced New England, George Whitefield, who came from England in 1739, spread the Great Awakening throughout the colonies, sometimes attracting audiences of 10,000 people. In barns, tents, and fields, he delivered rousing sermons that stressed that God was all-powerful and would save only those who openly professed belief in Jesus Christ. Those who did not would be damned into hell and face eternal torments. Whitefield taught that ordinary people with faith and sincerity could understand the gospels without depending on ministers to lead them.

Religious Impact The Great Awakening had a profound effect on religious practice in the colonies. As sinners tearfully confessed their guilt and then joyously exulted in being "saved," emotionalism became a common part of Protestant services. Ministers lost some of their former authority among those who now studied the Bible in their own homes.

The Great Awakening also caused divisions within churches, such as the Congregational and Presbyterian, between those supporting its teachings ("New Lights") and those condemning them ("Old Lights"). More evangelical sects such as the Baptists and Methodists attracted large numbers. As denominations competed for followers, they also called for separation of church and state.

Political Influence A movement as powerful as the Great Awakening affected all areas of life, including politics. For the first time, the colonists—regardless of their national origins or their social class—shared in a common experience as Americans. The Great Awakening also had a democratizing effect by changing the way people viewed authority. If common people could make their own religious decisions without relying on the "higher" authority of ministers, then might they also make their own political decisions without deferring to the authority of the great landowners and merchants? This revolutionary idea was not expressed in the 1740s, but 30 years later, it would challenge the authority of a king and his royal governors.

Cultural Life

In the early 1600s, the chief concern of most colonists was economic survival. People had neither the time nor the resources to pursue leisure activities or create works of art and literature. One hundred years later, however, the colonial population had grown and matured enough that the arts could flourish, at least among the well-to-do southern planters and northern merchants.

Achievements in the Arts and Sciences

In the coastal areas, as fear of American Indians faded, people displayed their prosperity by adopting architectural and decorative styles from England.

Architecture In the 1740s and 1750s, the Georgian style of London was widely imitated in colonial houses, churches, and public buildings. Brick and stucco homes built in this style were characterized by a symmetrical placement of windows and dormers and a spacious center hall flanked by two fireplaces.

Such homes were found only on or near the eastern seaboard. On the frontier, a one-room log cabin was the common shelter.

Painting Many colonial painters were itinerant artists who wandered the countryside in search of families who wanted their portraits painted. Shortly before the Revolution, two American artists, Benjamin West and John Copley, went to England where they acquired the necessary training and financial support to establish themselves as prominent artists.

Literature With limited resources available, most authors wrote on serious subjects, chiefly religion and politics. There were, for example, widely read religious tracts by two Massachusetts ministers, Cotton Mather and Jonathan Edwards. In the years preceding the American Revolution, writers including John Adams, James Otis, John Dickinson, Thomas Paine, and Thomas Jefferson issued political essays and treatises highlighting the conflict between American rights and English authority. The lack of support for literature did not stop everyone. The poetry of Phillis Wheatley is noteworthy both for her triumph over slavery and the quality of her verse.

By far the most popular and successful American writer of the 18th century was that remarkable jack-of-all-trades, Benjamin Franklin. His witty aphorisms and advice were collected in *Poor Richard's Almanack*, a best-selling book that was annually revised from 1732 to 1757.

Science Most scientists, such as the botanist John Bartram of Philadelphia, were self-taught. Benjamin Franklin won fame for his work with electricity and his developments of bifocal eyeglasses and the Franklin stove.

Education

Basic education was limited and varied among the colonies. Formal efforts were directed to males, since females were trained only for household work.

Elementary Education In New England, the Puritans' emphasis on learning the Bible led them to create the first tax-supported schools. A Massachusetts law in 1647 required towns with more than fifty families to establish primary schools for boys, and towns with more than a hundred families to establish grammar schools to prepare boys for college. In the middle colonies, schools were either church-sponsored or private. Often, teachers lived with the families of their students. In the southern colonies, parents gave their children whatever education they could. On plantations, tutors provided instruction for the owners' children.

Higher Education The first colonial colleges were sectarian, meaning that they promoted the doctrines of a particular religious group. The Puritans founded Harvard in Cambridge, Massachusetts, in 1636 in order to give candidates for the ministry a proper theological and scholarly education. The Anglicans opened William and Mary in Virginia in 1694, and the Congregationalists started Yale in Connecticut in 1701. The Great Awakening prompted the creation of five new colleges between 1746 and 1769:

- College of New Jersey (Princeton), 1746, Presbyterian
- King's College (Columbia), 1754, Anglican
- Rhode Island College (Brown), 1764, Baptist
- Queens College (Rutgers), 1766, Reformed
- Dartmouth College, 1769, Congregationalist

Only one nonsectarian college was founded during this period. The College of Philadelphia, which later became the University of Pennsylvania, had no religious sponsors. On hand for the opening ceremonies in 1765 were the college's civic-minded founders, chief among them Benjamin Franklin.

Ministry During the 17th century, the Christian ministry was the only profession to enjoy widespread respect among the common people. Ministers were often the only well-educated person in a small community.

Physicians Colonists who fell prey to epidemics of smallpox and diphtheria were often treated by "cures" that only made them worse. One common practice was to bleed the sick, often by employing leeches or bloodsuckers. A beginning doctor received little formal medical training other than acting as an apprentice to an experienced physician. The first medical college in the colonies was begun in 1765 as part of Franklin's idea for the College of Philadelphia.

Lawyers Often viewed as talkative troublemakers, lawyers were not common in the 1600s. In that period, individuals would argue their own cases before a colonial magistrate. During the 1700s, however, as trade expanded and legal problems became more complex, people felt a need for expert assistance in court. The most able lawyers formed a bar (committee or board), which set rules and standards for aspiring young lawyers. Lawyers gained further respect in the 1760s and 1770s when they argued for colonial rights. John Adams, James Otis, and Patrick Henry were three such lawyers whose legal arguments would ultimately provide the intellectual underpinnings of the American Revolution.

The Press

News and ideas circulated in the colonies principally by means of a postal system and local printing presses.

Newspapers In 1725, only five newspapers existed in the colonies, but by 1776 the number had grown to more than 40. Issued weekly, each newspaper consisted of a single sheet folded once to make four pages. It contained such items as month-old news from Europe, ads for goods and services and for the return of runaway indentured servants and slaves, and pious essays giving advice for better living. Illustrations were few or nonexistent. The first cartoon appeared in the *Philadelphia Gazette*, placed there by, of course, Ben Franklin.

The Zenger Case Newspaper printers in colonial days ran the risk of being jailed for libel if any article offended the political authorities. In 1735, John Peter Zenger, a New York editor and publisher, was brought to trial on a charge of libelously criticizing New York's royal governor. Zenger's lawyer, Andrew Hamilton, argued that his client had printed the truth about the governor.

According to English common law at the time, injuring a governor's reputation was considered a criminal act, no matter whether a printed statement was true or false. Ignoring the English law, the jury voted to acquit Zenger. While this case did not guarantee complete freedom of the press, it encouraged newspapers to take greater risks in criticizing a colony's government.

Rural Folkways

The majority of colonists rarely saw a newspaper or read any book other than the Bible. As farmers on the frontier or even within a few miles of the coast, they worked from first daylight to sundown. The farmer's year was divided into four ever-recurring seasons: spring planting, summer growing, fall harvesting, and winter preparations for the next cycle. Food was usually plentiful, but light and heat in the colonial farmhouse were limited to the kitchen fireplace and a few well-placed candles. Entertainment for the well-to-do consisted chiefly of card playing and horse-racing in the southern colonies, theater-going in the middle colonies, and attending religious lectures in Puritan New England.

The Enlightenment

In the 18th century, some educated Americans felt attracted to a European movement in literature and philosophy that is known as the Enlightenment. The leaders of this movement believed that the "darkness" of past ages could be corrected by the use of human reason in solving most of humanity's problems.

A major influence on the Enlightenment and on American thinking was the work of John Locke, a 17th-century English philosopher and political theorist. Locke, in his *Two Treatises of Government*, reasoned that while the state (the government) is supreme, it is bound to follow "natural laws" based on the rights that people have simply because they are human. He argued that sovereignty ultimately resides with the people rather than with the state. Furthermore, said Locke, citizens had a right and an obligation to revolt against whatever government failed to protect their rights.

Other Enlightenment philosophers adopted and expounded on Locke's ideas. His stress on natural rights would provide a rationale for the American Revolution and later for the basic principles of the U.S. Constitution.

Emergence of a National Character

The colonists' motivations for leaving Europe, the political heritage of the English majority, and the influence of the American natural environment combined to bring about a distinctly American viewpoint and way of life. Especially among white male property owners, the colonists exercised the rights of free speech and a free press, became accustomed to electing representatives to colonial assemblies, and tolerated a variety of religions. English travelers in the colonies remarked that Americans were restless, enterprising, practical, and forever seeking to improve their circumstances.

Politics

By 1750, the 13 colonies had similar systems of government, with a governor acting as chief executive and a separate legislature voting either to adopt or reject the governor's proposed laws.

Structure of Government

There were eight royal colonies with governors appointed by the king (New Hampshire, Massachusetts, New York, New Jersey, Virginia, North Carolina, South Carolina, and Georgia). In the three proprietary colonies (Maryland, Pennsylvania, and Delaware), governors were appointed by the proprietors. The governors in only two of the colonies, Connecticut and Rhode Island, were elected by popular vote.

In every colony, the legislature consisted of two houses. The lower house, or assembly, elected by the eligible voters, voted for or against new taxes. Colonists thus became accustomed to paying taxes only if their chosen representatives approved. (Their unwillingness to surrender any part of this privilege would become a cause for revolt in the 1770s.) In the royal and proprietary colonies, members of the legislature's upper house—or council—were appointed by the king or the proprietor. In the two self-governing colonies, both the upper and lower houses were elective bodies.

Local Government From the earliest period of settlement, colonists in New England established towns and villages, clustering their small homes around an open space known as a green. In the southern colonies, on the other hand, towns were much less common, and farms and plantations were widely separated. Thus, the dominant form of local government in New England was the town meeting, in which people of the town would regularly come together, often in a church, to vote directly on public issues. In the southern colonies, local government was carried on by a law-enforcing sheriff and other officials who served a large territorial unit called a *county*.

Voting

If democracy is defined as the participation of all the people in the making of government policy, then colonial democracy was at best limited and partial. Those barred from voting—white women, poor white men, slaves of both sexes, and most free blacks—constituted a sizable majority of the colonial population. Nevertheless, the barriers to voting that existed in the 17th century were beginning to be removed in the 18th. Religious restrictions, for example, were removed in Massachusetts and other colonies. On the other hand, voters in all colonies were still required to own at least a small amount of property.

Another factor to consider is the degree to which members of the colonial assemblies and governors' councils represented either a privileged elite or the larger society of plain citizens. The situation varied from one colony to the next. In Virginia, membership in the House of Burgesses was tightly restricted to certain families of wealthy landowners. In Massachusetts, the legislature was more open to small farmers, although there, too, an educated, propertied elite held

power for generations. The common people everywhere tended to defer to their "betters" and to depend upon the privileged few to make decisions for them.

Without question, colonial politics was restricted to participation by white males only. Even so, compared with other parts of the world, the English colonies showed tendencies toward democracy and self-government that made their political system unusual for the time.

HISTORICAL PERSPECTIVES: WAS COLONIAL SOCIETY DEMOCRATIC?

Was colonial America "democratic" or not? The question is important for its own sake and also because it affects one's perspective on the American Revolution and on the subsequent evolution of democratic politics in the United States. Many historians have focused on the politics of colonial Massachusetts. Some have concluded that colonial Massachusetts was indeed democratic, at least for the times. By studying voting records and statistics, they determined that the vast majority of white male citizens could vote and were not restricted by property qualifications. According to these historians, class differences between an elite and the masses of people did not prevent the latter from participating fully in colonial politics.

Other historians question whether broad voting rights by themselves demonstrate the existence of real democracy. The true test of democratic practice, they argue, would be whether different groups in a colonial town felt free to debate political questions in a town meeting. In the records of such meetings, they found little evidence of true political conflict and debate. Instead, they found that the purpose of town meetings in colonial days was to reach a consensus and to avoid conflict and real choices. These historians believe that the nature of consensus-forming limited the degree of democracy.

A third historical perspective is based on studies of economic change in colonial Boston. According to this view, a fundamental shift from an agrarian to a maritime economy occurred in the 18th century. In the process, a new elite emerged to dominate Boston's finances, society, and politics. The power of this elite prevented colonial Massachusetts from being considered a true democracy.

The question remains: To what extent were Massachusetts and the other colonies democratic? Much of the answer depends on the definition of democracy.

MULTIPLE-CHOICE QUESTIONS

Questions 1–3 refer to the excerpt below.

“To understand political power . . . we must consider what estate all men are naturally in, and that it is a state of perfect freedom to order their actions and dispose of their possessions . . . within the bounds of the law of nature, without asking leave, or depending upon the will of any other man. . . .

“Whosoever therefore out of a state of nature unite into a community must be understood to give up all the power necessary to the ends for which they unite into society, to the majority of the community . . . And this is done by barely agreeing to unite into one political society. . . . And thus that which begins and actually constitutes any political society is nothing but the consent of any number of freemen capable of a majority to unite. . . . And this is that . . . which did or could give beginning to any lawful government in the world.”

—John Locke, *Second Treatise of Government*, 1690

1. How is the topic of Locke’s writing similar to most writing in the colonies in the 18th century?
 - (A) He wrote about nature, and most writing was about nature or agriculture
 - (B) He wrote about the rights of the majority, and most writing was about rights and liberties
 - (C) He wrote about freemen, and most writing was about freedom and slavery
 - (D) He wrote about politics, and most writing was about politics or religion
2. Locke’s writings had the most direct influence on the
 - (A) American Revolution
 - (B) Great Awakening
 - (C) Mayflower Compact
 - (D) Zenger case
3. Which of the following groups in the colonies in the late 17th century would be most critical of Locke’s ideas?
 - (A) Slave owners
 - (B) Church leaders
 - (C) Merchants
 - (D) Women

Questions 4–6 refer to the excerpt below.

“[Lawyer for the prosecution:] Gentlemen of the jury; the information now before the Court, and to which the Defendant Zenger has pleaded not guilty, is an information for printing and publishing a false, scandalous, and seditious libel, in which His Excellency the Governor of this Province . . . is greatly and unjustly scandalized as a person that has no regard to law nor justice. . . . Indeed Sir, as Mr. Hamilton [Zenger’s attorney] has confessed the printing and publishing these libels, I think the jury must find a verdict for the King; for supposing they were true, the law says that they are not the less libelous for that; nay, indeed the law says their being true is an aggravation of the crime.

“[Mr. Hamilton:] Not so . . . I hope it is not our bare printing and publishing a paper that will make it libel. You will have something more to do before you make my client a libeler; for the words themselves must be libelous, that is false . . . or else we are not guilty.”

—James Alexander, lawyer for J. Peter Zenger,
The Trial of John Peter Zenger, 1736

4. Which of the following had an effect on attitudes toward traditional authority similar to the effect of the Zenger case?
 - (A) The arrival of new immigrants in the British colonies
 - (B) The growth of the legal profession
 - (C) The spread of the Great Awakening
 - (D) The westward movement of settlers
5. Which group would most strongly support Zenger’s position on the press?
 - (A) Farmers in New England
 - (B) Southern planters
 - (C) Settlers on the frontier
 - (D) Residents of cities
6. Which of the following was a long-term effect of the jury’s decision in the Zenger case?
 - (A) Zenger became a colonial leader
 - (B) The colonial press became more willing to criticize the British
 - (C) Restrictions on the press increased
 - (D) New York became the center of anti-British sentiments

Questions 7–10 refer to the excerpt below.

“For a nation thus abused to arise unanimously and to resist their prince, even to dethroning him, is not criminal but a reasonable way of vindicating their liberties and just rights; it is making use of the means, and the only means, which God has put into their power for mutual and self-defense. . . .

“To conclude, let us all learn to be free and to be loyal. . . . But let us remember . . . government is sacred and not to be trifled with. It is our happiness to live under the government of a prince who is satisfied with ruling according to law. . . . Let us prize our freedom but not use our liberty for a cloak of maliciousness. There are men who strike at liberty under the term licentiousness. There are others who aim at popularity under the disguise of patriotism. Be aware of both. Extremes are dangerous.”

—Jonathan Mayhew, church minister, “On Unlimited Submission to Rulers,” 1750

7. According to Mayhew, the people should be willing to challenge abuses by the
 - (A) royal governors
 - (B) church ministers
 - (C) slave owners
 - (D) king
8. Which of the following possible influences on Mayhew is most clearly reflected in his statement?
 - (A) The Great Awakening
 - (B) The teachings in the colonial colleges
 - (C) The ideas of the Enlightenment
 - (D) The rulings by royal governors
9. Mayhew would probably apply his warning, “not use our liberty for a cloak of maliciousness” to
 - (A) the Mayflower Compact
 - (B) the Act of Toleration
 - (C) Bacon’s Rebellion
 - (D) the Zenger case
10. What was the context in which Mayhew was writing?
 - (A) democratic practices were slowly increasing
 - (B) opposition to British rule of the colonies was increasing
 - (C) the Great Awakening was making authorities stronger
 - (D) restrictions on voting were becoming tighter

SHORT-ANSWER QUESTIONS

Use complete sentences; an outline or bulleted list alone is not acceptable.

Question 1 is based on the following graph.

Source: U.S. Bureau of the Census. *Historical Statistics of the United States, Colonial Times to 1970*

1. Using the graph, answer (a), (b), and (c).
 - (A) Briefly explain the role slavery played in the population growth of this period.
 - (B) Briefly describe the sources of immigrants other than from Africa during this period.
 - (C) Briefly explain the impact of the non-African immigration on ONE of the following sections of the colonies.
 - New England
 - Middle Colonies
 - Southern Colonies

Question 2. Answer (a), (b), and (c).

- (A) Briefly explain the role of ONE of the following factors in the growing colonial economy by the mid-18th century.
- agriculture
 - monetary system
 - transportation
- (B) Briefly explain ONE important difference between the economies of British colonies in the South and New England by 1750.
- (C) Briefly explain ONE limitation placed on the colonial economy by British government policy.

Question 3 is based on the excerpts below.

“The design of erecting a college in this province is a matter of such grand and general importance that I have frequently made it the topic of my serious meditation. . . .

“It is, in the first place, observable that, unless its constitution and government be such as will admit persons of all Protestant denominations upon a perfect parity as to privileges, it will itself be greatly prejudiced and prove a nursery of animosity, dissension and disorder . . .

“Should our college, therefore, unhappily through our own bad policy fall into the hands of any one religious sect in the province; establish its religion in the college . . . it is easy to see that Christians of all other denominations among us, will, from the same principles, rather conspire to oppose and oppress it.”

—William Livingston, Presbyterian, 1753

“Colleges are religious societies of a superior nature to all others. . . . colleges are societies of ministers for training up persons for the work of the ministry . . . all their religious instruction, worship, and ordinances are carried on within their own jurisdiction by their own officers and under their own regulations . . . And we know that religion, and the religion of these churches in particular, both as to doctrine and discipline, was the main design of the founders of this college, . . . and this design their successors are bound in duty to pursue. And, indeed, religion is a matter of so great consequences and importance that the knowledge of the arts and sciences, how excellent soever in themselves, are comparatively worth but little without it.”

—Thomas Clap, president of Yale University, 1754

3. Using the excerpts, answer (a), (b), and (c).

- (A) Briefly explain the main point in passage 1.
- (B) Briefly explain the main point in passage 2.
- (C) Briefly explain another implication of this debate in the mid-18th century colonies beyond the immediate question of the governance of colleges.

Question 4. Answer (a), (b), and (c).

- (A) Briefly explain the advances made in ONE of the following cultural areas during the mid-18th century in the colonies.
- architecture
 - painting
 - literature
- (B) Briefly explain the role of formal education during the mid-18th century in the cultural development you indicated in (a).
- (C) Briefly explain what groups in the colonies were generally unable to share in the growing pursuit of the arts and sciences.

THINK AS A HISTORIAN: QUESTIONS ABOUT CHANGE OVER TIME

Historical changes often occur gradually over years or decades or centuries. To recognize the beginning or the end of a change over time, historians often identify key events that mark the beginning or end of the change. The choice of key events reflects a historian's point of view. Which THREE of the following essay questions most clearly ask for an answer that focuses on change over time?

1. Compare and contrast the ideas and influence of Jonathan Edwards and George Whitefield.
2. How did the 1730s mark an important shift in colonial religious history?
3. Some people call the years from 1607 to 1733 the Era of English Settlement. Explain whether you think this label accurately distinguishes these years from the years before 1607 or after 1733.
4. Describe the ethnic diversity of the English colonies in 1775.
5. The Massachusetts school law of 1647 marked the beginning of a new era in American education.

PERIOD 2 Review: 1607–1754

LONG ESSAY QUESTIONS

Directions: The suggested writing time for each question is 40 minutes. In your response you should do the following:

Thesis: Present a thesis that makes a historically defensible claim and responds to all parts of the question. The thesis must consist of one or more sentences located in one place, either in the introduction or the conclusion.

Application of History Reasoning Skills: Develop and support an argument that applies history reasoning skills as directed by the question.

Supporting the Argument with Evidence: Utilize specific examples of evidence to fully and effectively substantiate the stated thesis or a relevant argument.

1. Compare and contrast the role of religion in the founding of the Spanish colonies in the 16th century with that of the English colonies in the 17th century.
2. Analyze why freedom of religion was important in the founding of some of the English colonies while being denied in others.
3. Analyze the impact of geography and the environment on the development of at least two different regions of the English colonies along the Atlantic coast in the 17th and 18th centuries.
4. Analyze the influence of TWO of the following on the development of a democratic society in the English colonies during the period from 1607 to 1745.
 - Bacon's Rebellion
 - Enlightenment
 - Great Awakening
 - Zenger case

DOCUMENT-BASED QUESTION

Directions: Question 1 is based on the accompanying documents. The documents have been edited for the purpose of this exercise. You are advised to spend 15 minutes planning and 45 minutes writing your answer.

In your response you should do the following.

- **Thesis:** Defensible claim and responds to all parts of the question.
- **Argument Development:** Develop a cohesive argument that accounts for the historical complexity and relationships among historical evidence/documents.
- **Use of the Documents:** Utilize at least six of the documents to support thesis.
- **Sourcing the Documents:** Explain the significance of the author's point of view, purpose, historical context, and/or audience for at least four documents.
- **Contextualization:** In the argument explain the broader historical events or developments immediately relevant to the question.
- **Evidence:** Provide an additional piece of evidence beyond those found in the documents to support or qualify the argument.

(For an example of complete directions, see page 724.)

1. Analyze the similarities and differences in the various influences and approaches toward unity in the English colonies in the period of the 17th and early 18th centuries.

Document 1

Source: The Mayflower Compact, 1620

This day before we came to harbor, observing some not well affected to unity and concord, but gave some appearance of faction, it was thought good there should be an association and agreement that we should combine together in one body, and to submit to such government and governors as we should be common consent agree to make and choose, and set out hands to this that follows word for word. . . . [We] do by these present, solemnly and mutually, in the presence of God and one another, covenant and combine ourselves together into a civil body politic, for our better ordering and preservation and furtherance of the ends aforesaid; and by virtue hereof to enact, constitute, and frame such just and equal laws, ordinances, acts, constitutions, offices from time to time as shall be thought most meet and convenient for the general good of the colony.

Document 2

Source: Fundamental Orders of Connecticut, 1639

As it has pleased the Almighty God . . . we, the inhabitants and residents of Windsor, Hartford, and Wethersfield are now cohabiting and dwelling in and upon the river of Conectecotte [Connecticut] and the lands thereunto adjoining; and well knowing where a people are gathered together the Word of God requires that, to maintain the peace and union of such a people, there should be an orderly and decent government established according to God, to order and dispose of the affairs of the people at all seasons as occasion shall require; do therefore associate and conjoin ourselves to be as one public state or commonwealth, and do, for ourselves and our successors and such as shall be adjoined to us at any time hereafter, enter into combination and confederation together, to maintain and preserve the liberty and purity of the Gospel of our Lord Jesus which we now profess.

Document 3

Source: The New England Confederation, 1643

The Articles of confederation between the Plantations under the Government of the Massachusetts . . . New Plymouth . . . Connecticut and . . . New Haven with the Plantations in Combination therewith. . . .

The said United Colonies . . . hereby enter into a firm and perpetual league of friendship and amity for offence and defence, mutual advice . . . upon all just occasions . . . and for their own mutual safety and welfare. . . .

It is by these Confederates agreed that the charge of all just wars, whether offensive or defensive, upon what part or member of this Confederation soever they fall . . . be borne by all the parts of this Confederation . . .

It is further agreed that if any of these Jurisdictions or any Plantation under or in combination with them, be invaded by any enemy whatsoever, upon notice and request of any three magistrates of that Jurisdiction so invaded, the rest of the Confederates without any further meeting or exposition shall forthwith send aid to the Confederate in danger.

Document 4

Source: William Penn, Plan of Union, 1697

A brief and plain scheme how the English colonies in the North parts of America... Boston, Connecticut, Rhode Island, New York, New Jerseys, Pennsylvania, Maryland, Virginia, and Carolinas—may be made more useful to the crown and one another's peace and safety. . . .

1. That the several colonies before mentioned do meet . . . at least once into two years in times of peace . . . to debate and resolve of such measures as are most advisable for their better understanding and the public tranquillity and safety.
2. That, in order to it, two persons . . . be appointed by each province as their representatives or deputies, which in the whole make the congress. . . .
6. That their business shall be to hear and adjust all matters of complaint or difference between province and province . . . to consider the ways and means to support the union and safety of these provinces against the public enemies.

Document 5

Source: The Albany Plan of Union, 1754

It is proposed that humble application be made for an act of Parliament of Great Britain, by virtue of which one general government may be formed in America, including all the said colonies, within and under which government each colony may retain its present constitution, except in the particulars wherein a change may be directed by the said act, as hereafter follows:

1. That the said general government be administered by a President-General, to be appointed and supported by the crown; and a Grand Council, to be chosen by the representatives of the people of the several Colonies met in their respective assemblies. . . .
15. That they raise and pay soldiers and build forts for the defense of any of the colonies. . . .
16. That for these purposes they have power to make laws, and lay and levy such general duties, imposts, or taxes, as to them shall appear most equal and just.

Document 7

Source: Ben Franklin, "The Problem of Colonial Union," 1754

[On] the subject of uniting the colonies more intimately with Great Britain by allowing them representatives in Parliament, I have something further considered that matter and am of opinion that such a union would be very acceptable to the colonies, provided they had a reasonable number of representatives allowed them; and that all the old acts Parliament restraining the trade or cramping the manufacturers of the colonies be at the same time repealed. . . .

I should hope, too, that by such a union the people of Great Britain and the people of the colonies would learn to consider themselves as not belonging to different community with different interests but to one community with one interest, which I imagine, would contribute to strengthen the whole and greatly lessen the danger of future separations.
